

# Dr. James Forster

Dr. James Forster is the son of the late-great Dr. Arnold Forster, one of the originators of Applied Kinesiology. Dr. James earned his doctorate from New York Chiropractic College in 1985, and was tutored in depth by his father for many years. Needless to say, he learned from the best. Dr. Forster runs a very successful ALL CASH practice, with 4 offices located in Manhattan, Brooklyn, and Long Island. He has spoken for many institutions, as well as on the radio on the benefits of chiropractic, nutrition, and health. In addition, from 1988-2001, Dr. Forster toured all over the U.S. as well as Europe as the personal chiropractor to the Ramones. His Mission is as follows:

"At this point in my career, I am turning my attention and dedication to educating my colleagues. I am teaching an integrated approach and an understanding of how to deliver primary healthcare with applied and clinical kinesiology. This method is complimented with nutrition and lifestyle changes to accurately treat "the cause" of patients' health concerns."

On hand will also be Dr. Jason Horowitz and Dr. Karissa Maggio. Both have trained extensively with Dr. Forster and are experts in

his work. They will be assisting in the multiple hands on workshops throughout the seminar.
